	Urgent	**Not urgent**
Important	**DO:** ● Fetch the listings JSON from the SimplifyJobs repo and keep only active, visible listings ● Filter by keywords ● Send out a push notification for new matches ● Run automatically on a schedule	**Schedule - (For V2.0+):** ● Run using GitHub Actions so it works even when computer is off ● Extra filters such as location, graduation data restrictions, and sponsorship needed ● Merge multiple listings in one notification
Not important	**Delegate:** ● JSON parsing (Gson) ● HTTP requests (Java's HttpClient) ● Push notifications (https://ntfy.sh/)	**Delete:** ● GUI or web dashboard ● Ranking the jobs based on match ● Pulling from multiple websites (this GitHub already does this)
